DETAILED ACTION

The amendment dated 9/16/08 has been entered.

Claims 1, 2, 4, 6-17 are pending.

Claims 4 and 6 are objected to because they depend from canceled claims.

Applicant's amendment has overcome the rejection based on Sweetman.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 2, 4, 6-8, 10 and 15-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent number 4,700,651 to Hale.
2. Claims 1, 2, 4, 6, 7, 9, and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent number 3,899,991 to Chatten, et al.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 11 and 12 rejected under 35 U.S.C. 103(a) as being unpatentable over Hale in view of either one of JP02176217 or U.S. Patent number 5,467,728 to Lucy.

Hale lacks the self lubricating material or the plastics with admixture of friction reducing agent. Each of JP02176217 and Lucy (5:59-6:10) describe self lubricating materials or plastics with friction reducing agent for use as bearing surfaces underwater. The advantage of such materials is to improve movement (i.e. to reduce friction) It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the Hale device to have included self lubricating material or the plastics with admixture of friction reducing agent as required by claims 11 and 12.

4. Claims 13 and 14 rejected under 35 U.S.C. 103(a) as being unpatentable over Hale in view of U.S. Patent number 6,347,911 to Blair.

Hale lacks the anti fouling agent.

Blair teaches the advantages of anti-fouling agent (2:37-57).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the Hale device to have antifouling agents as called for in claims 13 and 14.

5. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3672

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
